Dear John

SWITCH PANELS ON MOODY BOATS

On the Moody 27 and Moody 29 we are increasing the size of the switch panel from four way to six way and on the Moody 333 and Moody 368 from six way to eight way. Although this is costing us rather more, we shall be making no charge. However, you must appreciate that sometimes we are let down on delivery of these switch panels and therefore please bear with us should we be forced to fit the smaller sized panels in any of the boats.

Yours sincerely

D S King
